

## PAEDIATRIC BURN REFERRAL FROM EMERGENCY DEPARTMENT

## GUIDELINE FOR DRESSING IN ED FOR PAEDIATRIC BURN PATIENT

1. Pain relief before dressing (Syrup Paracetamol)
2. Burn Shield is NOT allowed in Paediatric patient (Not as dressing)
3. Simple dressing with sterile water and Jelonet / Bactigrass dressing
  - Secondary dressing with gauze and bandage
4. No need to derroof the blister
  - Enough with just puncturing the blister to remove the fluid
5. If wound involve fingers and toes
  - Need single digit dressing (NO Stump dressing)
6. Dressing by ED Nurses / MA
7. Dressing to be done at nearest clinic until the appointment given (need to provide memo to parents for the dressing)
