

Mild Traumatic Brain Injury Pathway for PED HTA

- 1) Decision for Observation vs Imaging will be made by emergency physician based on head injury clinical decision rule.
- 2) Patients deemed suitable will undergo a period of observation in the Paediatric Emergency Department HTA.
- 3) Decision for discharge post-observation period to be discussed with EP on duty.
- 4) The patient may undergo neuro-imaging if there is change in the clinical condition of the patient.*
- 5) All patients who have undergone neuro-imaging will be referred to the neurosurgical team.
- 6) Formal radiological report for the head CT will be provided in a timely manner. However this is not a requirement for neurosurgical review.
- 7) Any discrepancy of CT findings to be informed to the neurosurgical team +. Management decision will be at the discretion of the neurosurgical team.
- 8) Disposition (admission or discharge) of the patient will be made by the neurosurgical team. Decision to be made based on time and type of injuries and underlying pre-morbidities.
